

INTRODUCING **CRYPTO TOKEN**

Bitcoin is digital **gold**, while **Crypto token** is **DSMIG** (Digital Smart Intelligent **Gold**). The concept of super computer driven trading once available only to a set of Large Investors is now unlocked, and readily available to you.

GLANCE THROUGH THE EXPONENTIAL

WHAT IS CRYPTO TOKEN?

Crypto token is an advanced open source investment encrypted token with a decentralized platform that runs Smart Intelligent Contracts (**SMIC**) and also absolutely backed up **Gold**.

Which offers a trading, staking, lending platforms to users, this platform is the culmination of a long standing idea, to bring the magic of AI (**Artificial Intelligence**) and smart Intelligent Contracts (**SMIC**) to the world of trading, and make easily accessible to the public.

CRYPTO TOKEN INTELITRADE (INTELLIGENT TRADE)

At the heart of **Crypto token** lies a phenomenon we call "**Intelitrade**".

Intelitrade is a self-learning, smart intelligent (SI) based trading algorithm, which is way ahead of human times and other “trading-bots” available in the world of trade. **Crypto token intelitrade** offers a different approach to cryptocurrency globally that’s because it does not follow a single pre-fed trading strategy.

Intelitrade is thoroughly intelligent in it's actions because it has the ability to learn from every single trade it makes and continuously improving itself in the process yielding a 99.9% accuracy. For our users it means they can take advantage of this advanced cutting edge technology which was available to large investors and earn substantial returns on the investments.

CRYPTO TOKEN LENDING PLATFORM

In simple basis **crypto token** lending platform follow 4 steps.

- 1) Users buy **crypto token** and lends to intelitrade.
- 2) **Intelitrade** works it's magic and generates returns over investments through digital assets trading in Global markets.
- 3) **Crypto token** platform shares a part of the profit generated by it's intelitrade with the lender and ploughs the remaining into advancing intelitrade capabilities.
- 4) This increases the intellectual property valuation of the company and also results in appreciation of **crypto token** value.

HOW IS CTC INTELITRADE DIFFERENT (BETTER)?

CTC Intelitrade takes automated trading to a whole new level and this is how. Even the best of trading automation solutions that exist in the market today only use a static trading strategy. On the contrary, CTC intelitrade uses a self-learning, AI (Artificial Intelligence) based trading algorithm, what it means in simple basic is that instead of using a few fixed trading method all the time, CTC intelitrade learns with every trade it makes and keeps improving it's trading strategies at a rapid pace. CTC intelitrade's current algorithm is armed with many years of trading data, so you get to benefit from all of that technology in a glance. The key improvement is our secret source and this is what makes all the difference. Boiled down in Mathematical terms, CTC intelitrade uses.

- 1) High quality technical survey (TS) with
- 2) Conclusive market analysis (MA) and combines them to perform
- 3) High pitched trading (HPT) powered by Global Market Data
- 4) Artificial intelligence (AI) and SMIC (Smart Intelligent Contracts).

$[(TS+MA) * HPT] AI+SMIC$

WHY SHOW INTEREST IN **CRYPTO** TOKEN?

In basic terms, all ultra-successful people in the world have one thing in common; they think ahead of time and stay ahead of the curves. They have a vision for the future, if you count yourself in that league (or would want to). You don't need any more reasons to be interested.

LOOKING FOR 1 MORE REASON?

We will give you 5 reasons:

1. **Ease of use:**

Despite having a complex algorithms working behind the scenes, **CTC intelitrade** platform is simple to use, whether you are already a savvy user or just getting started, you should be able to appreciate the simplicity programmed into the platform.

2. **Security:**

CTC has developed the most sophisticated and advanced security infrastructure available throughout the industry to protect your digital assets using encrypted means. Once on **CTC** intellitrade platform, you can enjoy complete security in the knowledge of the fact that all your digital assets are fully insured against any and all kinds of threats.

3. **Trust:**

Despite the amazing profit margin, our users face zero risk when it comes to security of the digital assets and associated profits. We enjoy healthy margins over and above of what is offered to our users and ensure substantial liquidity at every point in time.

4. **Exceptional Profit:**

The crypto space presents an opportunity for some really exceptional upsides as it is. We are able to turbo charge this potential to completely new levels by using some really cutting edge, state of the art technology; we combine AI with SMIC (smart) with solid mathematical modeling and extremely high quality technical and analytical survey. This makes our **CTC intelitrade** a perfect combination of human ingenuity and machine capabilities.

5. **Science:**

This profit is considered by using a highly scientific approach to trading. We believe that there is a science behind everything and trading is not exceptional.

Over the years, we have been able to repeatedly polish our trading in various types of market, be it Forex, Bonds, Commodities, Stocks, etc., and now crypto currencies. Combining this time hound strategy with the power of AI and SMIC, has unlocked a totally new level of returns which were never possible using conventional approach. Working with **crypto token**, you can be sure of maximum security and smooth sailing in case difficulties arise and you need assistance somewhere, a solid support back up is available for all kind of issues that you might encounter.

Crypto token Currency (Purpose)

There were several ways in which you could have implemented the leading platform on **crypto token intelitrade**. After all

considerations, it was decided to develop a decentralized crypto currency which operates on a SMIC platform (Smart Intelligent Contracts) to form the bases of our platform. This enables **crypto token** to use the speed, flexibility and power of the underlined **blockchain** technology. Besides, The **CTC** also acts as an index of the company valuation. As the company grows in capability, influence and intellectual property, the value of the crypto currencies appreciates in proportion. This allows **CTC** users to participate and profit from company's growth and open a total new dimension to engage and grow their wealth.

CRYPTO TOKEN CURRENCY (TOTAL SUPPLY)

It is an obvious fact that the value potential of every given currency is governed by the amount of supply of that currency, after all technical analysis and market structurization.

CTC was put together to perfect balance between having enough liquidity and solid growth, potential, **crypto token's** total supply was decided to be **21 million tokens (21,000,000)** by which mining programs won't be in existence to prevent inflation and devaluation of tokens by users.

This total supply are one of the lowest among all conventional leading platforms which exist in the market today and hence the growth potential is one among the highest appreciation.

HOW CAN I TAKE ADVANTAGE?

Today you have a chance of growing your wealth using **crypto token intelitrade** algorithm. The platform provides various option for wealth creation and the users to get involved like

1. Lending

2. Staking
3. Trading

LENDING

The users have options to lend their **CTC** holding to the **intelitrade** system. Upon doing so users will receive profit every 24hrs. The **intelitrade** profit are based upon the daily earning made by the trading algorithm on that day. In totality **CTC** offers **intelitrade** profit of up to 45% per month on your lending amount.

The staking system will allow you to earn part of **CTC** that you choose to stake with the platform for users looking for method different from lending this could be another possible option.

TRADING

CTC can be traded **peer to peer** or traded for **gold** prior to user's choice. Issuance of limited supply is the key to rock solid state of value appreciation where by **21 million CTC (21,000,000)** would be the total amount of tokens created.

CTC (WITHDRAWALS) - (SALES)

CTC withdrawal comes in various methods convenient and profitable to users.

1. **Fiat**
2. **Gold**
3. **Bitcoin**
4. **Ethereum**

1. **FIAT**

CTC users have the option to convert token to fiat currency (\$, £, ¥, €) and request for withdrawals into their bank account anywhere in the world (transaction fees may apply).

2. **GOLD**

According to time, Gold have been an evolutionary means of money and cannot be rotated. Users can withdraw CTC and request for Gold coins. Shipped down to them anywhere in the world. this may take some days, but conversion is simple because we have partnered with a reputable Gold company to make dreams come alive. (Shipping cost apply).

3. **BITCOIN**

Bitcoin is a digital Gold and the first crypto currency unique in it's own attributes. Bitcoin is also a means of withdrawal of funds anywhere in the World.

4. **ETHEREUM**

Ethereum is a unique means of payment for CTC users anywhere in the world making it easy for them to cash out anytime of the day. Through maximum and simplified means.

TECHNOLOGY

With our leading cutting-edge and innovative technology we have analyzed a means to make crypto token purchased and sold using a high technology. "CT²M" (Crypto Token Teller Machine) currently being produced by a reputable company

to favour users anywhere around the Globe for easy means of withdrawals using just a wallet address, a barcode, or an e-mail address and user's pass key for that account for transactions without any need for a debit/credit card. Thanks to our team of innovative engineers.

CONTINENTAL E-TRADING

CTC can be adopted by various firms and easily accessible using various method of API for global insertion on website or application. To deal on **CTC** users can accept **CTC** on their website, applications or market places thanks to a limited supply of tokens which is the solid rock foundation of value appreciation and profits.

BLOCKCHAIN

Blockchain have been a remarkable technology since the invention of **Bitcoin**. In terms of impact, It's going to stand at par with the likes of the internet and pc. For the first time in mankind's history, We have found a solution that cannot be hackable to any kind of threats be it hacking, cracking and tampering attempts. This opens a whole new world of possibility of what can be done with this technology. **Crypto token** is at the four front of this technological revolution and harnesses the power of the amazing **blockchain** technology in new ways.

SMIC PLATFORM (Smart Intelligent Contract)

Just as we have used the most innovative technology for building our **intellitrade** platform, We wanted to have an equally technological foundation for **CTC**.

Our **SMIC** platform is the latest and would be the greatest Cryptocurrency available to the world today. **CTC** is powered by **SMIC** platform which gives it 3 advantages;

- 1) The strength, stability, speed and security of underlying SMIC [Blockchain](#).
- 2) Instant interoperability with at least 9 different [Blockchain](#) wallets.

Which are: [Bitcoin](#), Monero, Ethereum, Dash, [Ripple](#), [Bitcoin Cash](#), [Ethereum Classic](#), IOTA, Litecoin.

- 3) The ability to harness the power of SMIC technology.

Decentralized [Peer to Peer](#) (P2P) Structure

Perhaps the biggest strength of the [blockchain](#) technology lies in its decentralized nature. This is precisely what gives the [blockchain](#) its strength, resilience, immutability, value, security and independence from control by vested individuals. It's like having the power of a hive mine.

Been based on [Blockchain](#), [CTC](#) would be able to enjoy all the advantages by a decentralized [peer to peer](#) architecture.

SMIC (Smart Intelligent Contract)

Smart intelligent contract is better than smart contract because it implements real time value of world contracts in a digital fashion. Being based on [Blockchain](#), SMIC has more Resilience, Ultra Security, Better than other [blockchain](#) based applications.

[CTC](#) benefits from the power to deploy smart intelligent contracts in a whole new innovative ways.

Security

The biggest puzzle on the internet was security, which was solved by [blockchain](#) technology. SMIC ultra-secured [blockchain](#) technology was developed by our encryption engineers which provides a system which cannot be hacked, tampered, and impenetrable against all threats from all over the world.

"YOU DON'T HAVE TO BE GREAT TO START BUT YOU HAVE TO START TO BE
G R E A T " .

Imagine storing your invested wealth in "Gold"

Join the team of success!!!

THANK YOU
